

A PRIMARY control: lambda_max trend
 9/12 seeds pass (75%); green = canonical seed 20260519 (PASS)

B S-map nonlinearity (SECONDARY)
 n~75; power-limited in slow-passage regime

A: PRIMARY gate for controls – canonical seed (20260519) passes.

B: S-map nonlinearity is non-significant at n~75; annotated as a known power limit (SECONDARY; never used as a hard gate).
