

State vs composite driver: HG herring

unreturned_driver = REFUTED (composite-dependent; roe-era PRIMARY ref=0.149, recent=-0.155)

Window sensitivity: PRIMARY (roe era 1972-2004) ref=0.149 $\rightarrow$ returned=TRUE [REFUTED].

Pre-roe anchors (1951-1965, 1951-1972, 1960-1975) flip gate to NOT refuted.

Verdict robust to all defensible windows from 1972 onward. Composite-dependent (fishing + predation + PDO).
